## **Professional Summary**

I am an aspiring IT professional with more than six months of experience and hands-on experience in networking, server administration, and cybersecurity. Demonstrated success in user support and network maintenance through internships and projects. Proficient in both Windows and Linux environments. Recognized for ability to troubleshoot complex system issues and implement solutions that enhance operational efficiency. Eager to contribute technical skills and analytical abilities to support continuous improvement and cybersecurity measures in a dynamic university environment.

---

## **Experience**

### **Intern | CFAO Mobility Kenya** **July 2025 – September 2025**

- Provided IT support, facilitating smooth operations with zero downtime for critical activities.
- Assisted the network administrator in configuring access points and troubleshooting network issues, enhancing network reliability.
