PROFESSIONAL SUMMARY

Cloud & infrastructure-focused IT professional with practical, project-driven experience across cybersecurity, networking, systems administration and DevOps; including securing cloud/on-prem environments, containerized deployments and automated pipelines. Backed by internships spanning systems administration, network optimization and software development at Isuzu East Africa and CFAO Mobility Kenya.

SKILLS

- **Cloud, Systems & Orchestration:** AWS, Linux, Docker, Kubernetes, Proxmox
- **IaC, Scripting & CI/CD:** Terraform, Bash, GitHub Actions, Git
- **Security & Networking:** Cloudflare Tunnels, Trivy (container/image scanning), Twingate ZTNA, RBAC
- **Soft Skills**: Communication, Collaboration, Problem-solving, Attention to detail, Analytical

PROFESSIONAL EXPERIENCE

Junior DevOps Engineer | Truehost Cloud | *Aug 2026 – Present*

- **Backup & Disaster Recovery (DR) Orchestration:** Building an ongoing Kubernetes backup & disaster recovery pipeline with Kasten K10 and Databasus, delivering dashboard-driven, self-service PostgreSQL Point-in-Time Recovery (PITR) without manual DBA intervention.
- **Storage & Recovery Integration:** Tested and validated Longhorn persistent storage with MinIO as an automated backup target in a dev/test cluster, establishing a pattern for production rollout.

IT Intern - Systems and Infrastructure | CFAO Mobility Kenya | *July 2025 – Sept 2025*

- **Systems Compliance & Governance:** Executed security compliance checks on Windows systems and maintained infrastructure documentation to ensure 100% adherence to internal audits.
- **Network Infrastructure Maintenance:** Diagnosed and resolved critical network bottlenecks, directly increasing connectivity efficiency by 15% through proactive infrastructure optimization.
- **Website Administration:** Managed the corporate website enhancing user engagement by 10%.

IT Intern - Systems and Software | Isuzu East Africa | *May 2024 – Aug 2024*

- **Leadership & Software Development:** Led a cross-functional team in development of a full-stack application that streamlined internal workflows within the procurement department saving 30% of data-entry processing time. Developed the core application functionality and delivered strategic progress presentations to stakeholders.
- **Systems Administration:** Maintained 99.9% uptime of core operational systems and managed role-based access control (RBAC) structures within Microsoft Active Directory.
- **Asset Management:** Managed the lifecycle, configuration and inventory tracking of IT assets.

PROJECTS

- **Automated Cloud Infrastructure Provisioning via CI/CD:** Architected modular Terraform infrastructure (networking, compute layers) for improved code reusability, with GitHub Actions enforcing automated testing, formatting, and plan-verification gates before deployment.
- **Containerized Quiz Application:** Containerized an app using Docker on an on-prem Proxmox server, securely exposing workloads via Cloudflare Tunnels to bypass port forwarding.
- **Network Segmentation & Perimeter Security:** Implemented isolated network segmentation via Linux bridges and integrated local DNS/Adblocker layers with Twingate ZTNA for strict firewall control.
- **Windows Server Deployment & Identity Management:** Configured dual Windows Server VMs to build a redundant Active Directory Domain Services (AD DS) framework, mapping Group Policies, structural access controls and network-attached media shares.

EDUCATION & CERTIFICATIONS

- BSc. IT | Multimedia University of Kenya | Coursework complete (*Graduation: October 2026)*
- **Certs**: Kubernetes Cloud Native Associate, Fortinet Fundamentals in Cybersecurity (NSE2)
